About

The **Drive 4G-X RV** is our most powerful in-vehicle cell phone signal booster certified in the US and Canada. The Drive 4G-X RV boosts voice and data with max FCC-allowed 50 dB system gain, enhancing 4G LTE, as well as 3G and 2G network signals, up to 32x. RVers get fewer lost connections and dead zones, better call quality, faster data uploads and downloads when they are out in their RV.

As with all weBoost boosters, all components needed come in one package for easy DIY installation. This includes both a 110V AC wall plug and a 12V fused DC hardwire power supply. The Drive 4G-X RV works with all cellular devices and all North American carriers.

All boosters come with a 2-year warranty.

Installation

- 1 Receives signal:** The powerful antenna reaches out to access a voice and 3G, 4G, and LTE data signal, and delivers it to the booster.
- 2 Boost signal:** The booster receives the signal, amplifies it, and serves as a relay between your phone and the nearest cell tower.
- 3 Broadcasts signal:** Your devices get a stronger signal, and calls and data are fed through the booster back to the network.
